DETAILED ACTION

Election/Restrictions

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - Claims 1-19, drawn to a contact-less identification tag, classified in class
 340, subclass 572.1.
 - II. Claim 20, drawn to a method for manufacturing an identification tag, classified in class 257, subclass 919.

The inventions are distinct, each from the other because of the following reasons:

- 2. Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case invention I and II are distinct since invention I pertains to a contact-less identification tag, and invention II pertains to the process of making the identification tag, wherein the identification tag would have been readily made by another and materially different process.
- 3. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.
